ZOiS, Center for East European and
Eurasian Studies, Berlin

15 December h. 13-15 Room 1.3

On the occasion of this series of seminars we invite students and the academic community at the Forlì Campus to reflect on the structural and long-lasting processes that have shaped the Ukrainian experience in the European and Eurasian context - in an attempt to go beyond the mere dramatic developments of the war that began in February 2022. History, politics, society, culture and migration will be at the core of our exploration, hosting the contributions of Ukrainian and international experts.

The seminars are part of the Workshop on Eastern Europe and Eurasia. They are in presence for all 1st yr Mirees students. Only other participants (2nd yr and others) can attend at distance
